The objection to the drawings is withdrawn in view of Applicant's remarks.

The rejections over Young and Kim et al are withdrawn in view of the amendments to the claims.

Claims 1-34 and 38-47 are allowed over the prior art of record for the same reasons as those set forth on pages 19-20 of Applicant's amendment 07/23/04.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the feature "the vias of imaging surfaces occupy *no more than 5% of the surface area of the imaging surface* " of claims 35-37.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 35-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Nowhere in the original specification does it disclose the particular upper limit "*no more than 5% of the surface area of the imaging surface* ". As seen from the instant Figures 2-4, it appears that the vias of each imaging surfaces occupy no more than 25% of the surface area of the imaging surface. Therefore, the original disclosure does not

Art Unit: 2871

provide support for the feature "*no more than 5% of the surface area of the imaging surface* ", as is now recited in claims 35-37.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
